EDUCATION

Goldsmiths, University of London, *BSc Computer Science* 2020 – 2025

- Final Grade: ***2nd Class Honours (Upper Division)*** | Dissertation Grade: ***79%***
- Completed Modules Include - Algorithms and Data Structures I & II | Object Oriented Programming | Software Design and Development | Discrete Mathematics | Interaction Design | Natural Language Processing
- *Skills developed* - Software Engineering | OOP | Algorithm Design | Data Structures | HCI| NLP | Machine Learning | Database Management | Analytical and Computational Thinking

University of The People, *BSc Business Administration* 2017 – 2019

- Final Grade: GPA 3.2/4.0
- Completed Modules Include – Business Communications | College Algebra | Managerial Accounting | Business Policy and Strategy | Principle of Finance | Leadership | Strategic Management
- *Skills developed* - Business Strategy | Leadership & Team Management | Business Communication | Strategic Decision-Making | Project Management

PROJECTS

Real Time Sign Language Translator (BSc Computer Science final project)

- Developed a real-time sign language translation web application using React.js, MediaPipe Tasks and TensorFlow.js, integrating hand landmark detection and gesture recognition for accessible communication.
- Built and trained a custom gesture classification model using Python, TensorFlow/Keras and Scikit-learn, using the ASL Signs dataset from Kaggle; integrated the trained model into the browser for real-time inference.
- *Technologies*: Python, TensorFlow/Keras, Scikit-learn, MediaPipe, TensorFlow.js, React.js, Vite.

WORK EXPERIENCE

Work and Holiday Australia Scheme Nov 2024 – Present

- **Fluidra Australia,** Melbourne, Victoria | *Swimming Pool Lane Rope Assembler*
- **The University of Sydney,** Sydney, New South Wales | *Barista*
- **Simplot,** Devonport, Tasmania | *Broccoli and Cauliflower Process Operator*

Uniqlo, *Digital Product Owner* Aug 2022 – Nov 2024

- Led the design and development of a Novelty Recorder System across 70+ Uniqlo stores, translating operational needs into a user-centred solution that saved over **THB 80** million annually.
- Owned the development of a warehouse ordering app, simplifying staff workflows and reducing manual work by 50+ hours per week.
- *Skills developed:* Digital Product Management, Human-Centred Design, Requirements Gathering, Workflow Optimisation, Python, AppSheet, Power Automate, Google Apps Script, Looker Studio, Figma.

London Stock Exchange Group (formerly Refinitiv), *Application Support Engineer* Jun 2021 – Jul 2022

- Provided Level 3 technical support to internal teams and external clients, investigating and resolving complex application issues, system errors, and technical incidents.
- Conducted root cause analysis and advanced troubleshooting to identify recurring issues, minimise service disruptions, and ensure timely incident resolution.
- Reduced client waiting times by **80%** through improved troubleshooting processes and efficient issue management.

Iglu, *Software Engineer* Nov 2020 – Jan 2021

- Developed and maintained cloud-based applications for clients, leveraging AWS services, including EC2 and S3, to build and deploy scalable solutions.
- Designed and implemented front-end components using React.js and Redux, creating responsive and user-friendly interfaces.
- Developed back-end functionality and application logic using Node.js and TypeScript, integrating front-end components with server-side services.

Bangkok Airways, *Data Analyst Trainee* Sep 2019 – Dec 2019

- Conducted exploratory data analysis using Python to identify emerging travel patterns, customer behaviour, and trends that could support business decision-making.
- Extracted, cleaned, and processed datasets using SQL queries to support the Data Analytics Department and provide relevant insights to senior management.
- Assisted in designing and developing interactive Power BI dashboards to visualise key business metrics, making complex datasets easier to interpret.

Pan Food, *ERP Coordinator* Jul 2018 – Aug 2019

- Coordinated the implementation of an ERP system, overseeing project activities and working with stakeholders to ensure successful adoption across business functions.
- Conducted user interviews and stakeholder consultations to identify business requirements, understand operational challenges, and translate needs into system specifications.
- Analysed existing business processes and mapped workflows to identify inefficiencies and opportunities for process improvement through ERP integration.
- Achieved a **74%** user satisfaction score following implementation, reflecting the successful delivery of a system aligned with business needs.

Johnson & Johnson, *PMO – ERP Coordinator* Jan 2017 – Jun 2018

- Coordinated ERP implementation projects across business functions, supporting project planning, execution, and delivery while achieving an **89%** project success rate across assigned initiatives.
- Developed and maintained project schedules, milestones, and progress trackers using Microsoft Excel and Trello to monitor deliverables and ensure projects remained on schedule.
- Liaised with cross-functional stakeholders, project managers, and technical teams to communicate project updates, coordinate activities, and address implementation challenges.
- Monitored project progress against agreed timelines and objectives, identifying potential delays and escalating issues to relevant stakeholders.

Netflix, *English – Thai – English Translator & Localization Coordinator* Sep 2014 – Dec 2016

- Led Southeast Asia localisation initiatives, coordinating translation workflows and quality assurance (QA/QC) processes to ensure consistent language quality and cultural relevance across content.
- Translated and localised movies, television series, and documentaries between English and Thai, maintaining linguistic accuracy, cultural context, and consistency with Netflix's content standards.
- Collaborated with internal product teams to evaluate translation tools, identify workflow inefficiencies, and recommend improvements to enhance localisation processes.

VOLUNTEER EXPERIENCE

Generation Global, *Global Alumni Ambassador Council 2025* Nov 2024 – Jan 2026
Devonport Library, *Digital Help Volunteer* Feb 2025 – Jun 2025
Paris Paralympic Game 2024, *Event Service Team Member* Aug 2024 – Sep 2024
